16. Public relations .....
17. Dealer.....
18. Marketing program.....

### Translate the following passage into Persian.

Integrated Information System with today's sophisticated hardware, software, and communications technologies, it is often difficult to classify a system as belonging uniquely to one specific application program. Organizations increasingly are consolidating their information needs into a single, integrated information system. One example is SAP, a German software package that runs on mainframe computers and provides an enterprise- wide solution for information technologies.
